Software Engineer

Software Engineer with a strong background in designing, developing, and deploying full-stack applications. Experienced in leveraging modern technologies such as React, Ruby on Rails, Next.js, GraphQL, and TypeScript to deliver high-performance, scalable solutions.

WORK EXPERIENCE

Jampak • San Diego, CA • 08/2023 - Present

Software Engineer • Full-time

- Spearheaded the development of Jampak, a pioneering web application that connects artists with alternative venues.
- Deployed and optimized the application on AWS, achieving 99.9% uptime and reducing operational costs by 20%.
- Designed and managed a scalable database using Prisma and Postgres, improving data retrieval speed by 30%.

Zeal • 05/2021 - 09/2023

Software Engineer III • Full-time

- Consulting firm dedicated to collaborating with cross-functional teams to provide top-tier support on fullstack applications.
- Consistently improved team efficiency by 28% through development and maintenance of critical internal tools, also improved test coverage.
- Ensured smooth user interaction and increased customer satisfaction by transforming design mock-ups into interactive and responsive web components.
- Implemented key features and resolved a major authentication issue in a React Native app, improving user engagement by 40%.
- Developed a Full Stack MVP using Next.js and Python/FastAPI in just one month, which secured the next round of funding for startup.
- Mentored 50+ students at Learn Academy, aiding in their understanding of React and Ruby on Rails, and contributing to their successful completion of full-stack capstone projects.

C47 STUDIOS • 11/2020 - 05/2021

Full Stack Developer • Full-time

- Redesigned and developed an MVP using modern technologies, which led to a 50% increase in user acquisition and retention.

Alexandria.io • 10/2019 - 08/2020

Full Stack Developer • Full-time

- Integrated blockchain technology into applications, facilitating direct payments and improving transaction efficiency, resulting an increase in user earnings.
- Developed a crypto trading bot using React, Node, and external APIs, enhancing user profitability with FLO and RVN coins.

SKILLS

AI, Algorithms, AWS, CI/CD, CSS, Docker, EC2, GraphQL, Heroku, JavaScript, Jest, Lambda, LLMs, Microservices, MySQL, Next.js, PostgreSQL, Python, React.js, RESTful APIs, Ruby, Ruby on Rails, S3, TypeScript, Web Application

EDUCATION

Bachelor Degree

California State University
Chico, CA, USA
06/2017
